Installing JMeter Plugin

<https://jmeter-plugins.org/>

The screenshot shows the JMeter Plugins website. The top navigation bar includes links for 'Install', 'Browse Plugins', 'Documentation', 'Usage Statistics', 'Support Forums', and 'JMX Editor'. Two blue arrows point to the 'Install' and 'JMX Editor' links. The main heading is 'Custom Plugins for Apache JMeter™'. Below this, a search bar is present. Two plugin cards are visible: 'BlazeMeter Step-by-step Debugger' and 'Directory Listing Config'. The 'Installing Plugins' section is highlighted in yellow, containing instructions to download 'plugins-manager.jar' and place it in the 'lib/ext' directory. A blue arrow points to 'plugins-manager.jar'. The footer includes copyright information for 2009-2024.

Installing Plugins

The easiest way to get the plugins is to install Plugins Manager. Then you'll be able to install any other plugins just by clicking a checkbox.

Download **plugins-manager.jar** and put it into `lib/ext` directory, then restart JMeter.

If you experience any issues with plugins installation, don't hesitate to ask at Support Forums.
